Sharing a love for the art of furniture and lighting making, Thorup is rooted in a desire to inspire a deeper appreciation for objects crafted with integrity, designed to endure, and where every element serves a purposeful function.

Founded in 2018 and based in Copenhagen, Thorup curates a collection shaped by a deep curiosity for materials—where the design journey is as important as the final form. By uniting traditional craftsmanship with innovative methods—and a reverence for knowledge—each piece is brought to life with honesty and intention, resonating with its purpose and place.

## THE COLLECTION

Explore a cohesive collection of furniture and lighting, thoughtfully created to foster a deeper appreciation for integrity and lasting value in design. Every piece is shaped by purpose—balancing function and aesthetics in a way that resonates with both the user and the space it inhabits.

Crafted through a close production chain—based in Denmark and Europe—each object reflects a mindful, quality-driven approach. Rooted in traditional craftsmanship and guided by a made-to-order ethos, this method ensures not only the highest standard of production and product but also meaningful collaboration at every stage.

## ANTO ROOM DIVIDER —DESIGNED FOR THE OSLO OPERA HOUSE

Designed by Kasper Thorup for the Norwegian Opera House in Oslo, in collaboration with renowned architect studio Snøhetta, the Anto Room Divider defines a space while embracing openness—creating flow, connection, and flexibility. Crafted from a sleek brushed stainless-steel frame and upholstered in wool flag halyard, Anto is available in two sizes and three material options.

Naturally sound-absorbing, it combines versatility and adaptability to enhance both function and aesthetics. Ideal for dynamic interiors, both contract and private, it brings architectural clarity and natural warmth to any setting. The Anto Room Divider launches Summer 2025.

## MIO TABLE

The Mio Table is minimalist in presence but solid in materials, elevating any space with quiet elegance and serenity. Designed by Kasper Thorup, the Mio Series is a testament to the harmonious blend of Danish joinery traditions and Japanese-inspired woodworking—exposing every element and joint for an honest expression, complemented by steel signature detailing.

The Mio collection includes tables in three sizes, coffee tables, and stools, all available in oiled and dark-stained solid FSC-certified oak.

## MIO STOOL & COFFEE TABLE

The Mio Coffee Table and Stool are versatile interior pieces, designed to enhance any space with quiet elegance and serenity. Featuring a minimalist yet bold expression, each piece highlights the natural character of solid oak, exposed joinery, and signature steel details - to highlight that every component serves a purpose.

Reflecting Thorup's ethos, where all aspects of the design process is as significant as the final product, the stool is made from the leftover wood of the coffee tables—making full use of the valuable material.

## NOEL CHAIR SERIES

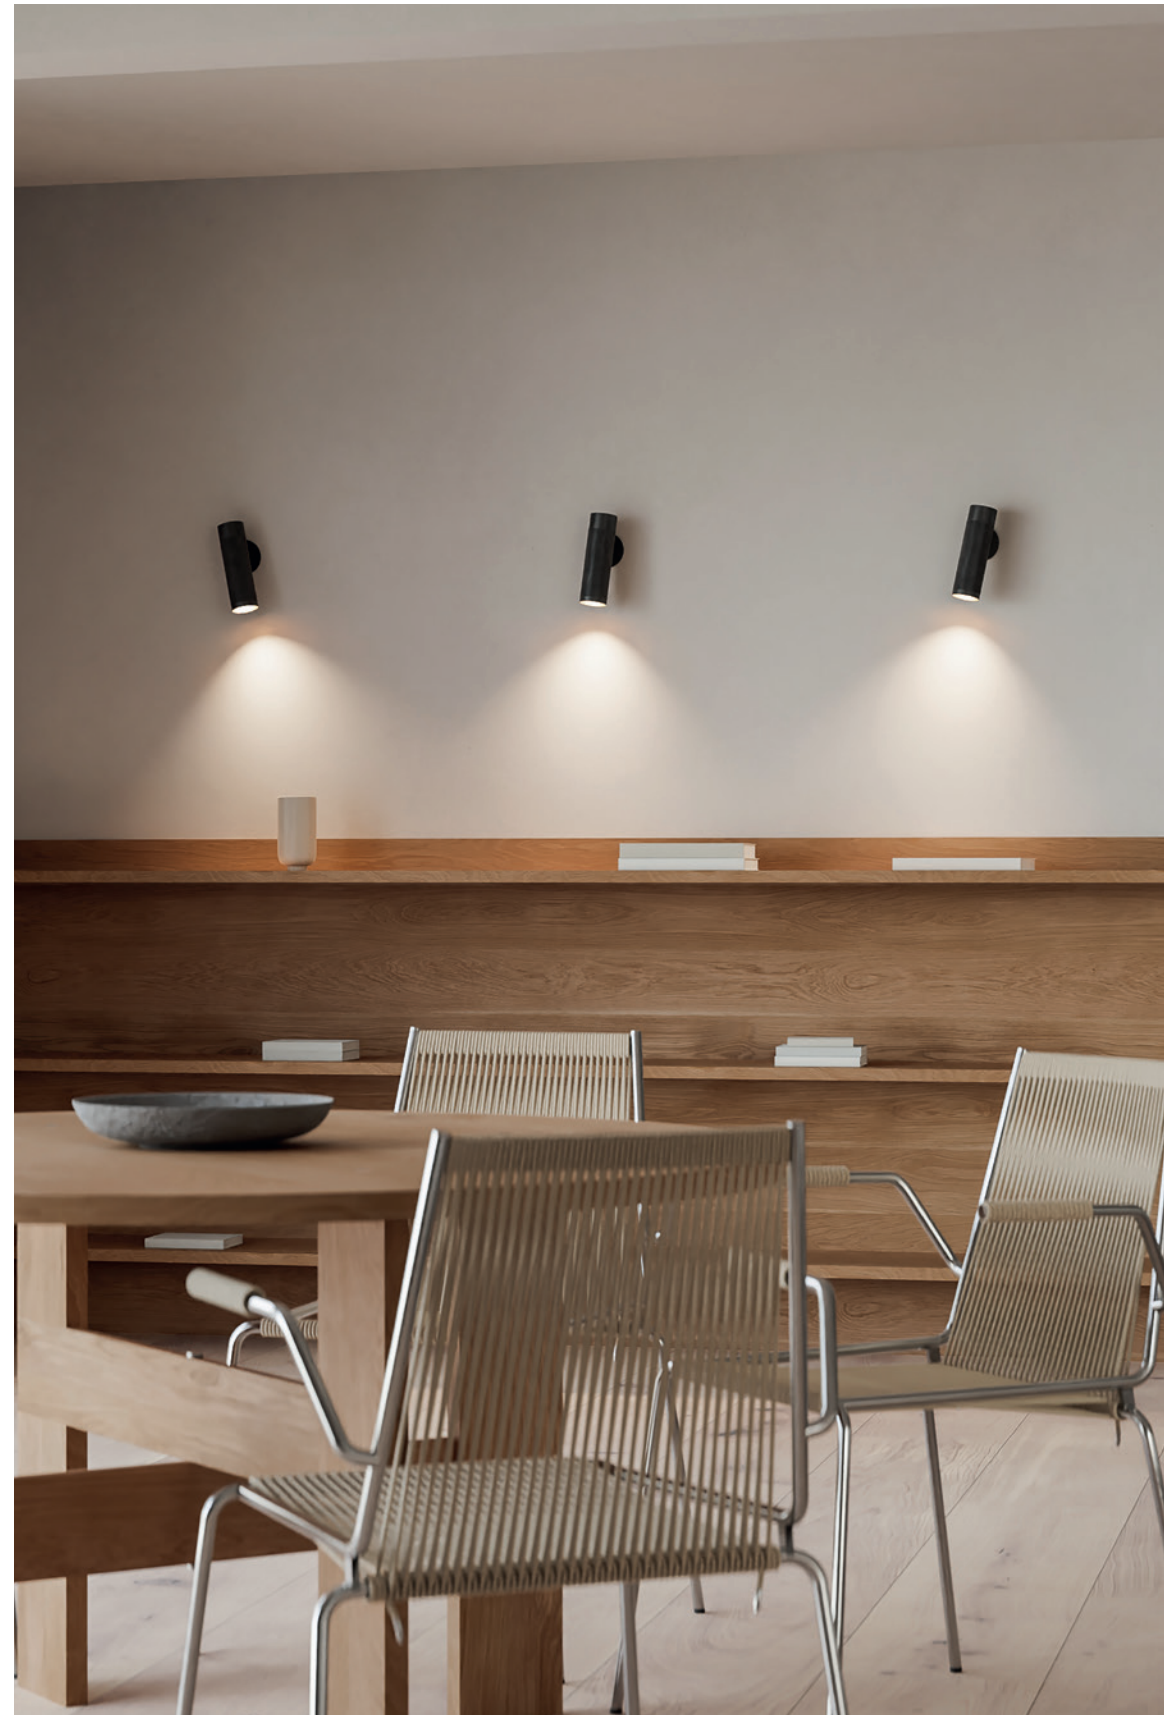

Noel is an EU Ecolabel-certified series of chairs, designed to bring lasting value to the people and places they reside in. Their minimalist style embodies quiet luxury, effortlessly enhancing both large and small interiors. Made from a few durable components—a brushed stainless steel frame and linen or wool flag halyard upholstery—each chair is crafted with integrity, designed to endure, with every element serving a purposeful function.

## NOEL CHAIR

As the initial chair in the Noel Series, Noel is designed by Kasper Thorup as a contemporary seating solution that brings lasting value—in materials, design, and for the spaces it inhabits. With a minimalist yet bold expression, it balances modern clarity with classic character, establishing itself as a new design staple.

Available with or without armrests, and with a choice of brushed stainless steel or black powder-coated steel tube bases, each chair is paired with linen or wool flag halyard upholstery in natural hues.

## NOEL STOOLS

As elevated versions of the Noel Chair, the Noel Bar and Counter Chairs are designed to provide enduring function. Featuring the same minimalist yet bold expression, they offer modern clarity and classic character in elevated settings. Ideal for kitchen islands, high tables, and bar or restaurant areas, they are available in brushed stainless steel or black powder-coated bases, paired with linen or wool flag halyard upholstery in natural hues.

## NOEL LOUNGE CHAIR

The Noel Lounge Chair retains the minimalist essence of the Noel series. It features a steel tube base in brushed or black powder-coated steel and is upholstered in durable, tactile fabrics like linen or wool flag halyard in natural hues.

The gently sloped frame with curved legs and refined joinery supports a broad, reclined backrest for comfort and relaxation. Showcasing the Noel series' signature minimalist look, with an oversized seat that can be paired with a soft cushion, it is ideal for both residential and contract settings.

MATERIAL CURIOSITY

Exclusively available for Thorup, the Noel Chair Series is offered in premium wool flag halyard upholstery in a selection of natural hues, imbuing each chair with refinement and uniqueness.

Based on the virtuous concept of repurposing, the wool flag halyard is dedicated to implementing pioneering initiatives to reduce material waste. The pure and undyed wool offers unparalleled diversity and durability, and the wool flag halyard is made using sheep wool sourced from the Faroe Islands, embodying Thorup's commitment to innovation and authentic materials.

EU ECOLABEL CERTIFIED CHAIRS

With a deep reverence for natural materials and a dedication to exceptional artisanship, the Noel Series is designed to offer lasting value — both in function and aesthetics — while making a positive impact on people and the planet.

Each Noel Chair proudly carries the EU Ecolabel—a mark of excellence awarded to products that meet rigorous environmental standards in their entire life cycle. This certification stands as an external validation of our dedication to quality, sustainability, and responsible design.

Designed, crafted, and assembled by hand in Denmark, Patrone is a high-quality lighting series made from solid materials, featuring Thorup's signature diamond-cut brass surface—a detail that enhances any space with tactile allure and timeless elegance.

Created for a multifaceted lighting experience, the series offers both versatility and customizability—in materials, finishes, and function. The series includes Ceiling Lights, Wall Lights, and Pendant Lights, each available in a curated range of refined finishes, allowing for tailored solutions across diverse interior settings.

## WALL LAMPS

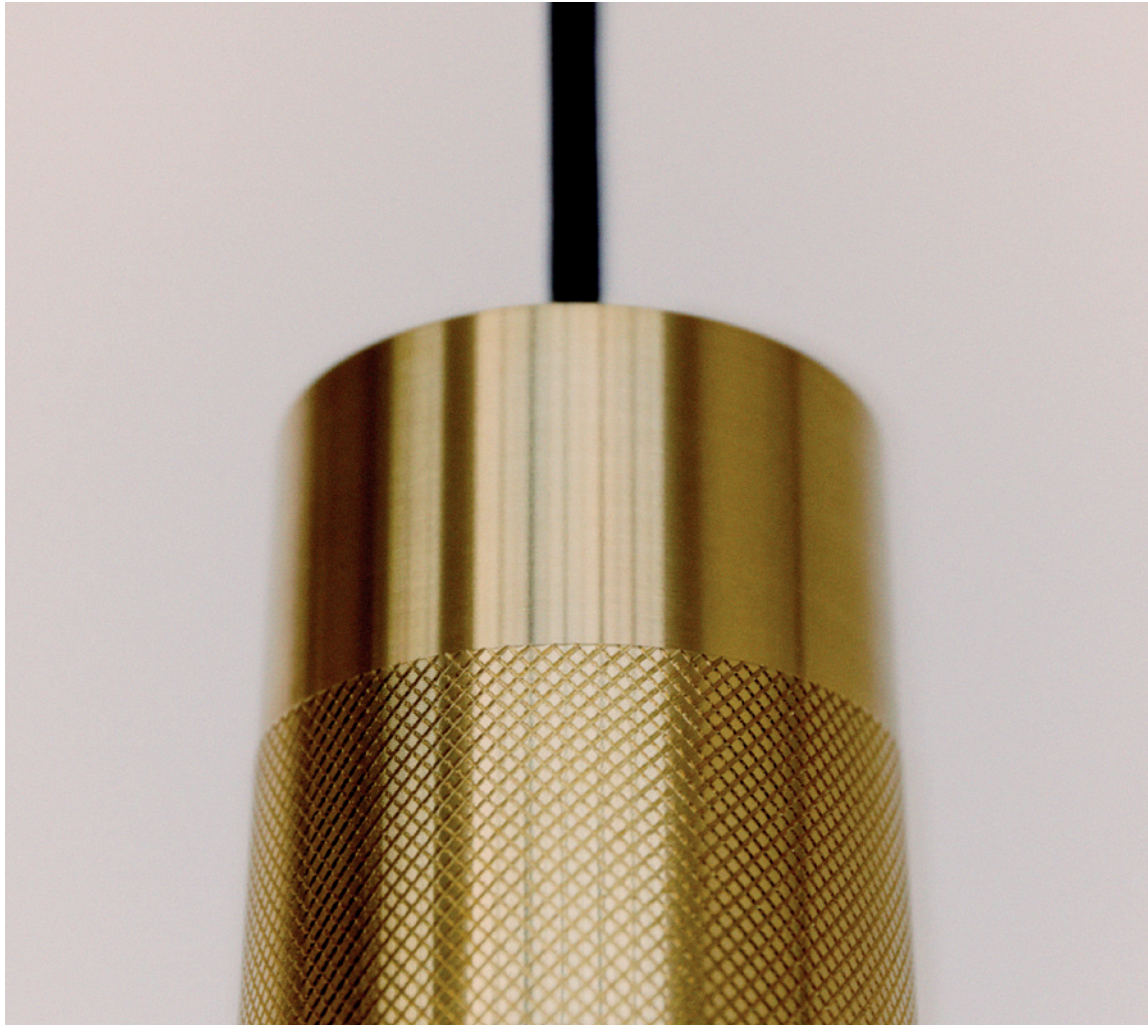

Inspired by multifaceted lighting experiences, the Patrone Wall Lamps offer both versatility and elegance. Available in recessed or surface-mounted versions and a curated selection of refined finishes, they merge minimal design with elevated sophistication — illuminating spaces with a perfect balance of style and function.

## CEILING LAMPS

The Patrone Ceiling Lights emanate timeless minimalism with flexible functionality, providing ambient illumination precisely where it's needed. Available in surface-mounted, recessed, canopy, and track versions, the adjustable fixtures offer ambient illumination and a tactile, contemporary feel—ideal for both residential and commercial spaces.

## PENDANT LAMPS

The Patrone Pendant Lamps feature a sleek cylindrical design that exudes refined simplicity. Available in three sizes and a selection of elegant finishes, they bring a touch of quiet luxury to any space. Crafted from solid brass, they seamlessly blend minimal design with maximum sophistication to create a stylish, functional atmosphere.

## CLUSTER LAMPS

Patrone Cluster Lamps balance cylindrical proportions with sculpted elegance. Featuring Thorup's signature diamond-cut surface, they blend industrial edge with poetic refinement. Available in two sizes, their minimalist design adds quiet sophistication while delivering multi-dimensional illumination that celebrates the purity of brass and radiates warmth throughout any space.
